Grant Management Software

Discover the best solution for end-to-end grant management

Specific & flexible custom workflows for Local Enterprise Offices In Ireland

Designed to deliver a great end-to-end grant application experience for all stakeholders

Organisations have saved up to 18,000 hours annually in admin using Submit.com

At our core is innovation, Submit.com seeks out to creatively deliver solutions to problems that exist in the world using technology. Five years ago we noticed an opportunity to use our award-winning secure cloud technology to solve a problem that existed for the Local Enterprise Offices of Ireland.

The LEOs existing method relied predominantly on an unsecured paper-based system. This was tedious for clients and staff, resulting in applications taking significant amounts of time to be processed. This method also created vast amounts of administration and filing work. Furthermore, all mentor assignment management capabilities were in paper form and this could often cause assignment tracking to be difficult and take up much LEO Executive time which could be, alternatively, spent helping further client companies.
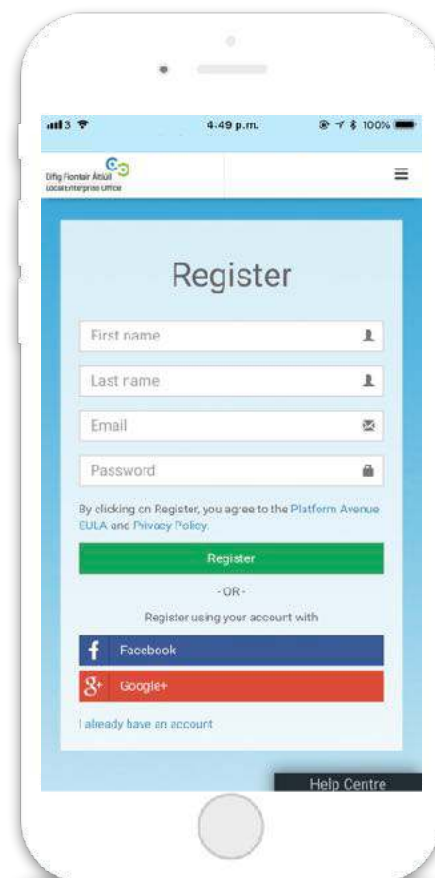

Submit.com has worked closely with a number of Local Enterprise Offices over five years. We understand intimately the LEO grant application workflow. With that knowledge Submit.com has evolved to be a complete end-to-end custom solution focused on maximising the effectiveness of Local Enterprise Grants.

With the help of these Local Enterprise Offices we have managed to create an experience that works for the clients applying,

as well as for the LEO Executives and Mentors who's focus should be working with the clients to make sure they are maximising the effectiveness of Local Enterprise Grants.
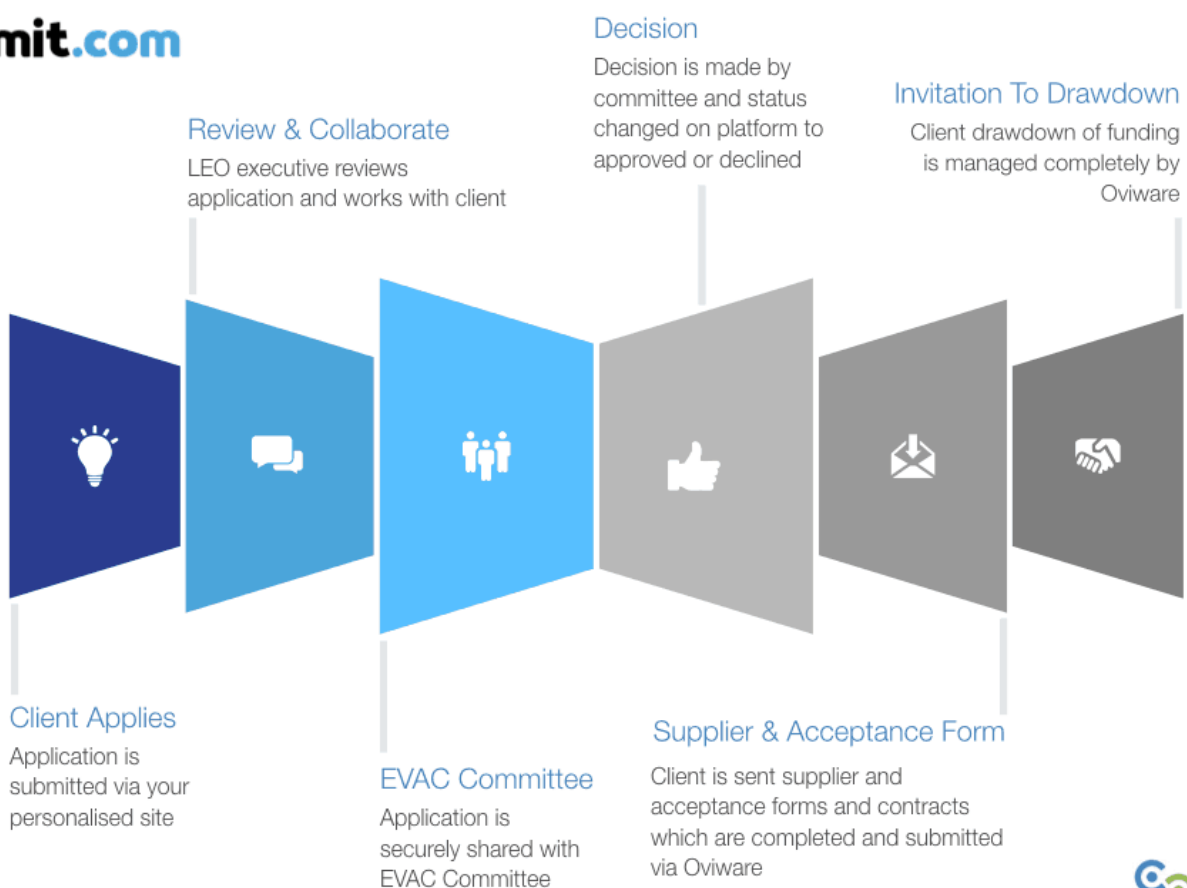

Save time and get better results for clients

As a LEO Executive, your time is best spent with your clients maximising their chances for success. Submit.com saves you valuable time by streamlining the application process making sure all applications are fully completed in a timely manner leading to a positive decision for the client.

Local Enterprise Office Grant Application Flow

Super easy to manage all grant applications In one place

Grant applications typically tend to seek a large amount of information for evaluation. Submit.com has simplified this process allowing clients to not only submit an application at any time and from anywhere, but it also lets them present supplementary information in attachment form, such as videos, links, spreadsheets and documents, allowing you to evaluate and application quickly in a more structured manner with all this information in one secure location on the Submit.com platform.
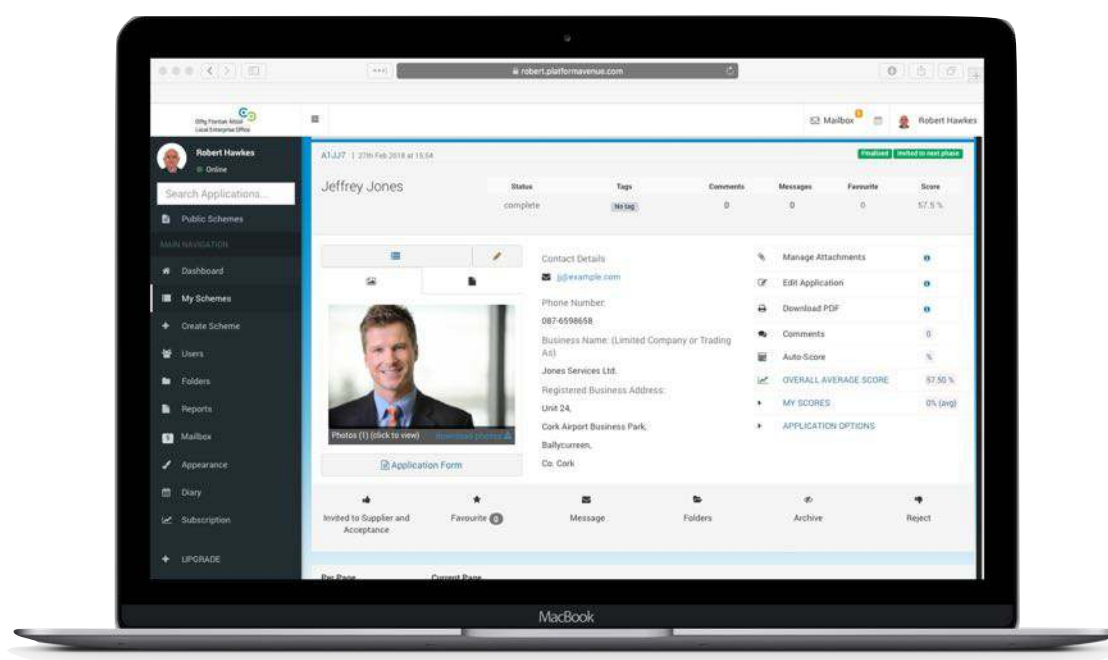

Key features.

Video Interview

Meet the person behind the grant application with Submit.com video interview technology its as simple as adding an interview question to the form.

Advanced Security Features

Submit.com is fully compliant with the latest online security protocols, elevating concerns around GDPR.

Real Time Reporting

Real-time reporting tools which help you provide the required information to your stakeholders with minimum fuss.

Smart EVAC Meeting Tools

An important part of the application workflow is it's ability to prepare grant applications for EVAC meetings in a more effective and efficient manner.

Submit.com auto-populates Application Summaries for the EVAC, significantly improving efficiency and cutting the costs of producing multiple copies of applications and supporting documentation.

Spreadsheet Questions

We realise you need to ask applicants to give projections using spreadsheets. You can do this as a table question in Submit.com and we even do the auto-calculations for you.

Autosaving Drafts

Working with a client to submit a quality grant application is vital for its success. Submit.com automatically saves a draft of the application after every question making sure nothing is lost and you can jump in and help the client at anytime.
Other features.

Quick Search

Searching through hundreds or thousands of applications can be like finding a needle in a haystack. Using Submit.com's quick-search function you can find what you're looking for in matter of seconds.

Customisation

Add your own background images, favicons, logos, colour schemes and more. Really make your homepage your own.

Your own domain

We'll set you up with you own domain, every aspect of which is yours. No banners, no ads, just you, your team, and the tools to create, promote, and manage schemes.

Score and discuss

Discuss applications securely with your team and assign individual scores. Average scores for applications will be auto calculated and can be used to sort applications.

Notifications

Customise your email notifications so that you are informed when applications are received. This is perfect for keeping on top of things, especially if a deadline is approaching.

Team permissions

Manage your own team with the right permissions. Creating team member accounts is quick, and you can control which scheme each team member can access and what they are allowed to do within thus making sure only the right people have access to sensitive information.

Submit.com has streamlined our process and has made our grant application process more manageable. All of the data, applications, required documents and so forth are in one place which saves so much time and effort. Now we can spend more time with our clients maximising their chances for success. The staff at Submit.com continues to be responsive to our needs and treats us as a priority and valued customer.

Breda Fox
Head Of Enterprise Galway LEO

Working with the team at Submit.com has been an excellent experience. Attention to detail, understanding of the brief and the needs of our organisation along with response times second to none.Working with the system for just over 6 months we can see the efficiencies that it has brought both internally and to our client base I would have no hesitation in recommending Submit.com

Sean O Sullivan
Head Of Enterprise South Cork LEO
